MATHEMATICS
UNIT 1: NON-CALCULATOR
INTERMEDIATE TIER

FRIDAY, 10 NOVEMBER 2017 – MORNING

1 hour 45 minutes

ADDITIONAL MATERIALS

The use of a calculator is not permitted in this examination.
A ruler, protractor and a pair of compasses may be required.

INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen. Do not use gel pen or correction fluid.

You may use a pencil for graphs and diagrams only.

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer **all** the questions in the spaces provided.

If you run out of space, use the continuation page at the back of the booklet. Question numbers must be given for all work written on the continuation page.

Take π as 3·14.

INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.

Unless stated, diagrams are not drawn to scale.

Scale drawing solutions will not be acceptable where you are asked to calculate.

The number of marks is given in brackets at the end of each question or part-question.

In question **3**(a), the assessment will take into account the quality of your linguistic and mathematical organisation, communication and accuracy in writing.

4. A fraction is written as $\dfrac{a}{b}$.

- The fraction is a multiple of 0·2.

- The fraction is greater than $\dfrac{1}{2}$.

- The fraction is less than 75%.

Write down the fraction as $\dfrac{a}{b}$, where a and b are whole numbers. [3]

6. Sara is in charge of a game at her school's Christmas party.

Two fair spinners are spun as shown in the example below.
1st Spinner   2nd Spinner

People can make a two-digit number using the numbers shown on the spinners using the following rule:

Multiply the number on the first spinner by 10 and then add the number on the second spinner.

One example, as shown above, makes the number 21, because $2 \times 10 + 1 = 21$.

(a) How many different numbers can be made playing this game? [1]

....

....

....

(b) Write down all the prime numbers that can be made playing this game. [2]

....

....

....

(c) What is the probability that a person makes a prime number when playing the game once? [2]

....

....

(d) Sara charges each person £1 to play the game once.
Each player who makes a prime number from their spins wins £2.
How much profit would the school expect to make when 180 people play the game?　[4]

7. *ABCD* is a quadrilateral.
$A\hat{B}C = 93°$, $B\hat{C}D = 122°$ and $A\hat{D}C = 85°$.
Points *P* and *Q* lie on the quadrilateral as shown, such that *AP = AQ*.

Prove that triangle *APQ* is an equilateral triangle.
You must show all your working.

14. A group of pupils from a school took part in The Urdd National Eisteddfod.
All of them competed in at least one of the following competitions: *Singing*, *Dancing* or *Reciting*.

- 2 of them only took part in a *Dancing* competition.
- 5 only took part in a *Reciting* competition.
- No one took part in both a *Reciting* and a *Dancing* competition.
- 3 took part in both a *Singing* and a *Dancing* competition.
- 9 took part in a *Reciting* competition.
- 22 took part in a *Singing* competition.

The Venn diagram below shows some of the above information.
The universal set, ε, contains all of the pupils in the group.

One of the pupils in the group is chosen at random.
What is the probability that this person **only** took part in a *Singing* competition? [5]

17. A cylinder just fits inside a hollow cube with sides of length m cm.

Diagram not drawn to scale

The radius of the cylinder is $\dfrac{m}{2}$ cm.

The height of the cylinder is m cm.

The ratio of the volume of the cube to the volume of the cylinder is given by

volume of cube : volume of cylinder

$$= k : \pi,$$

where k is a number.

Find the value of k.
