**MATHEMATICS – NUMERACY  
UNIT 1: NON-CALCULATOR  
HIGHER TIER**

TUESDAY, 6 NOVEMBER 2018 – MORNING

1 hour 45 minutes

**ADDITIONAL MATERIALS**

The use of a calculator is not permitted in this examination.  
A ruler, a protractor and a pair of compasses may be required.

**INSTRUCTIONS TO CANDIDATES**

Use black ink or black ball-point pen. Do not use gel pen or correction fluid.

You may use a pencil for graphs and diagrams only.

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer **all** the questions in the spaces provided.

If you run out of space, use the continuation page at the back of the booklet. Question numbers must be given for the work written on the continuation page.

Take  $\pi$  as 3.14.

**INFORMATION FOR CANDIDATES**

You should give details of your method of solution when appropriate.

Unless stated, diagrams are not drawn to scale.

Scale drawing solutions will not be acceptable where you are asked to calculate.

The number of marks is given in brackets at the end of each question or part-question.

In question 4(a), the assessment will take into account the quality of your linguistic and mathematical organisation, communication and accuracy in writing.

For Examiner's use only

### Formula List - Higher Tier

**Area of trapezium** =  $\frac{1}{2}(a + b)h$

**Volume of prism** = area of cross-section  $\times$  length

**Volume of sphere** =  $\frac{4}{3}\pi r^3$

**Surface area of sphere** =  $4\pi r^2$

**Volume of cone** =  $\frac{1}{3}\pi r^2 h$

**Curved surface area of cone** =  $\pi r l$

**In any triangle ABC**

**Sine rule**  $\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$

**Cosine rule**  $a^2 = b^2 + c^2 - 2bc \cos A$

**Area of triangle** =  $\frac{1}{2}ab \sin C$

### The Quadratic Equation

The solutions of  $ax^2 + bx + c = 0$  where  $a \neq 0$  are given by  $x = \frac{-b \pm \sqrt{(b^2 - 4ac)}}{2a}$

### Annual Equivalent Rate (AER)

AER, as a decimal, is calculated using the formula  $\left(1 + \frac{i}{n}\right)^n - 1$ , where  $i$  is the nominal interest rate per annum as a decimal and  $n$  is the number of compounding periods per annum.

1. (a) Mold is on a bearing of  $065^\circ$  from Ruthin.  
What is the bearing of Ruthin from Mold?  
Circle your answer. [1]

245°                  095°                  295°                  125°                  315°

.....

.....

- (b) When it is 19:40 in Cardiff, it is 23:40 in Dubai.

- (i) What time is it in Dubai when it is 13:30 in Cardiff?  
Circle your answer. [1]

15:30                  10:30                  09:30                  17:30                  19:30

.....

.....

- (ii) What time is it in Cardiff when it is 02:10 in Dubai?  
Circle your answer. [1]

20:10                  06:10                  22:10                  10:10                  00:10

2. Yousef has a piece of wallpaper.

He wants to draw some of the leaves to create a different design to screen print.

Yousef draws lines on the wallpaper.  
Some of the lines are parallel.  
He measures four angles and needs to calculate four more.

Diagram not drawn to scale

Diagram not drawn to scale

Find the size of each of the angles  $a$ ,  $b$ ,  $c$  and  $d$ .

[4]

.....

.....

$a = \dots\dots\dots^\circ$        $b = \dots\dots\dots^\circ$        $c = \dots\dots\dots^\circ$        $d = \dots\dots\dots^\circ$

3. Mrs Butler asked all her friends how many pairs of shoes they own. Here are the results.

Number of pairs of shoes	1 to 6	7 to 12	13 to 18
Number of people	1	5	8

- (a) Mrs Butler says,  
'Most people in Wales own more than 12 pairs of shoes.'

Is Mrs Butler correct in using this data to come to this general conclusion?  
You must give a reason for your answer.

[1]

Yes

No

.....

.....

.....

- (b) Write down **different groups** Mrs Butler could have chosen so that all of the data can be analysed more accurately.

[2]

- (b) (i) Jade's new suitcase weighs 3 kg.  
When it is packed, her suitcase must not weight more than 25 kg altogether.  
What percentage of the 25 kg does Jade have left for packing? [2]

.....

.....

.....

.....

- (ii) Which one of the following formulae could be used to work out the volume of Jade's new suitcase?  
 $a$ ,  $b$  and  $c$  are measurements of the 3 dimensions of the suitcase.  
Circle your answer. [1]

$$a + b^2 + c \quad 2a^2c - 4\pi b^2 \quad abc + \pi a^2c \quad a^3 - b^2 + c \quad a + b^3 + c$$

- (c) Jade needs a new passport photograph.  
A passport photograph must be 45 mm high by 35 mm wide.

Jade has a mathematically similar photograph that she could reduce in size to use as her new passport photograph.  
The height of this photograph is 9 cm.  
Calculate the width of this photograph. [2]

5. The picture shows a mountain hut.  
The hut
- stands on a rectangular base,
  - has a uniform cross-section.

(a) Draw a sketch of the plan view of the mountain hut. [1]

(b) This mountain hut is shown on a map.  
The scale of the map is 1 : 50 000.  
On the map the mountain hut is 4.2 cm from a farmhouse.  
How far away is the hut from the farmhouse?  
Give your answer in km. [3]

.....

.....

.....

.....

.....

.....

.....

.....

Distance is ..... km

(c) The map below shows the placement of four wind turbines, and a road connecting two of the turbines.

A new wind turbine, Efail, is to be built.

It is to be placed

- on the road connecting Bryn turbine and Cwm turbine, and
- on the perpendicular from Aber turbine to the road.

The map is drawn using a scale of **2 cm represents 1 km**.

How far will Efail turbine be from Dŵr turbine?

You **must** use constructions to answer this question, using **only a pair of compasses and a ruler**. [4]

**Scale 2 cm represents 1 km**

• Aber turbine

.....

.....

Distance is ..... km

6. Gwen records the time she spends writing each of 240 text messages. She finds the following.

- The greatest time is 1 minute 5 seconds.
- The range of the times is 60 seconds.
- The median is 45 seconds.
- The lower quartile is 23 seconds.
- The interquartile range is 32 seconds.

(a) Use the graph paper to draw a box-and-whisker diagram to represent Gwen's data. [5]

(b) How many of these text messages took Gwen more than 23 seconds to write? [2]

.....

.....

.....

..... text messages

7. (a) There is a queue of 96 people waiting to buy concert tickets.

Liam has 8 vouchers to hand out, offering 20% off ticket prices.

He has decided to use a systematic sampling method to select who receives these 8 vouchers.

Liam has randomly selected the 6th person in the queue to receive the first voucher.

Use the table below to give the positions in the queue of the 8 people who would receive vouchers. [2]

.....

.....

.....

.....

.....

.....

.....

Voucher	1	2	3	4	5	6	7	8
Position in the queue	6th	.....	.....	.....	.....	.....	.....	.....

(b) Gerallt used his 20% off voucher to buy tickets. He paid £120 for tickets using the voucher. How much would these tickets have cost Gerallt without a voucher? [2]

.....

.....

.....

.....

.....

.....

.....

Cost without a voucher £ .....

9. A group of pupils sat a mathematics test. The teacher grouped their marks using the intervals 1 to 20, 21 to 40, and so on. She then drew the following cumulative frequency diagram to display the results.

Cumulative frequency

- (a) Phoebe is one of the pupils who sat the test. Phoebe says, 'The cumulative frequency diagram shows that the median mark was 70.'

Explain why the median mark may not be 70.

[1]

.....

.....

.....

(b) Consider the pupils who had a mark of 80 or less.

How many of these pupils would have needed to score more than 80 for Phoebe's estimate of the median to be 80?

Circle your answer.

ON THIS PAGE**

12. An architect has been asked to design a square-based glass pyramid that is to be built in a park. The vertex at the top of the pyramid will be directly above the centre of the square base. The edges of the pyramid will be made from steel. Each sloping face will be made from glass.

*Diagram not drawn to scale*

- (a) The architect first plans to make a scale model of the pyramid. The scale model will have base sides of length 14 cm and a vertical height of 8 cm.

The architect has drawn the following diagram of the model.

*Diagram not drawn to scale*

Calculate the length of each sloping edge of the model.

Give your answer in the form  $a\sqrt{b}$ , where  $a$  is an integer and  $b$  is a prime number. [6]

.....
